PROFILE SUMMARY

Results-driven **Full-Stack Developer** and **Front-End Tech Lead** with 11+ years of experience engineering high-performance enterprise web applications. Specialized in **Angular (v12-17)**, **NgRx**, **RxJS**, **TypeScript**, and **Node.js**. Expert at incorporating modern AI-driven architectures using **Generative AI Engineering** frameworks to deliver business solutions.

TECHNICAL SKILLS

ARTIFICIAL INTELLIGENCE

Generative AI Engineering, AI Agent Workflows, Prompt Engineering, LLM Integration Contexts

FRAMEWORKS & LIBRARIES

Angular v12-17, NgRx State Management, RxJS Observables, Angular Signals, Node.js, Bootstrap, Ionic Framework

LANGUAGES

TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass/Less, PHP

APIS & ARCHITECTURE

RESTful APIs, GraphQL, Micro-Frontends, OOP, MVC, MVVM Structural Patterns

DEVOPS & CI/CD

Git, Azure Pipelines, GitHub Actions, Jenkins Automation, Jira, Agile/Scrum

TESTING & VERIFICATION

Jasmine, Karma, Protractor, Postman API Testing, UI Testing

DATABASES & IDENTITY

MySQL, WordPress, PHPMyAdmin, Azure B2C Identity Access Management, OAuth / Social Login Security

WORK EXPERIENCE

Sr. Tech Lead - Front-End

Dec 2018 - Apr 2025

HCL Technologies Pvt. Ltd. | Client: Caterpillar India

- Led development of modular **Angular 16/17** enterprise applications serving 100K+ active users across global lines.
- Architected robust **NgRx & RxJS** centralized state management patterns and built a shared component catalog adopted cross-team.
- Integrated **Angular Signals** in Angular 17 configurations to introduce ultra-performant, fine-grained reactive state execution.
- Collaborated with backend engineers to optimize strict **REST and GraphQL API contracts**.
- Designed automated verification workflows with **Jasmine, Karma, and Protractor** via **GitHub Actions, Jenkins, and Azure Pipelines**.
- Mentored a 6-member engineering unit, setting coding metrics, and running structured code reviews.
- Implemented enterprise security protocols via **Azure B2C Authentication**.

Sr. Web Developer

Apr 2018 - Dec 2018

Keystone Business Solutions | Client: Mercedes-Benz R&D India

- Built responsive, accessible web interfaces for the PDM 2020 Product Catalog leveraging **Angular 12+**, Bootstrap UI, and Sass.
- Constructed a full dual-portal operational architecture (user + admin) supporting high-throughput **CRUD functionalities**.

Sr. PHP & Web Developer

Aug 2013 - Sep 2017

Pavans Group TechSoft Pvt. Ltd.

- Engineered and deployed complete full-stack web and CMS layers utilizing **PHP, WordPress, HTML5, CSS3**, and structured **MySQL**.
- Modernized legacy system architecture and fine-tuned relational database queries via PHPMyAdmin to optimize load times.
- Supervised entire product timelines single-handedly, including stakeholder requirement modeling, system mapping, and deployment.

KEY PROJECTS

CAT Productivity (Caterpillar) — **Angular 17, Signals, NgRx, Azure B2C**

Directed architecture for a 100K+ user enterprise system using global NgRx, fine-grained Signals reactivity, and secure enterprise Azure B2C login verification.

Health Equipment Insight — **Angular 16, NgRx, RxJS, GraphQL API**

Assembled a modular analytic tracking dashboard system optimizing backend data payloads through custom GraphQL schemas.

EDUCATION

B.E. - Information Technology

Sardar Vallabhbhai Patel Institute of
Technology, Vasad, Gujarat
Jul 2009 - May 2013

CERTIFICATIONS

Generative AI Engineering

Outskill

PERSONAL DETAILS

Languages: English, Hindi, Gujarati
(Native)
Nationality: Indian
Availability: Immediate
Interests: Paper Quilling, Walking,
Reading, Drawing

PSR (Caterpillar India) — *Angular 13, Node.js, Responsive UI Components*

Built a production workflow layout handling scale-heavy user groups using mobile-responsive modular component guidelines.

PDM 2020 Product Catalog — *Angular 5, Bootstrap, MVC Pattern*

Created a comprehensive Mercedes-Benz R&D catalog tracking sprint timelines and technical solution statements over stable CRUD engines.

Yachtii Recruitment Platform — *Ionic, Hybrid Mobile (iOS/Android), Social Auth*

Formulated a hybrid mobile environment targeting maritime industry recruitment utilizing cross-platform Ionic components and OAuth profiles.

Seismic e-Staffing — *LexisNexis API, Social Sign-In, Mobile-First*

Integrated deep index search endpoints allowing corporate partners to safely run background queries and track end-to-end recruitment funnels.
